Murabaha financing

Facility 1

The Group signed a long-term Murabaha financing agreement with The National Commercial Bank as the Murabaha Investment Agent and Murabaha Participants, amounting to facilities of SAR 2,400 million and USD 160,000,000 on 1 March 2020. As per the terms of the agreement, the term of the Murabaha facility is for a period of seven years. The Murabaha facility is secured by promissory notes issued by the Company. The facility is repayable in six half yearly installments commencing after 12 months from the date of signing the agreement. As at 30 September 2020, the Group has fully utilized this facility. The Murabaha facility carries markup at London Interbank Offered Rate ('LIBOR') plus agreed margin per annum.

The loans contain certain financial covenants. A future breach of covenants may lead to renegotiation including increase in profit rates, withdrawal of facility or repayment on demand. The covenants are monitored on a periodic basis by management. In case of potential breach, actions are taken by management to ensure compliance.

During the period ended 30 September 2020, there has been non-compliance of certain covenants on outstanding facility with National Commercial Bank. However, as per terms of the agreement, there was no impact on these condensed consolidated interim financial statements including classification of the liability as at period end.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Underlying the definition of fair value is the presumption that the Company is a going concern and there is no intention or requirement to curtail materially the scale of operations or to undertake a transaction on adverse terms.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis.

17.1 Accounting classification and fair values (continued)

When measuring the fair value the Group uses market observable data as far as possible. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that can be accessed at the measurement date.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

The following table shows carrying amounts and fair values of financial assets and financial liabilities, including their levels in the fair value hierarchy. It does not include fair hierarchy value information for financial assets and financial liabilities not measured at fair value if the carrying amount is a reasonable approximation of fair value.

Financial Liabilities

Measurement of fair values

The following tables show the valuation techniques used in measuring Level 2 and Level 3 fair values for financial instruments measured at fair value in the statement of financial position, as well as the significant unobservable inputs used.

17. FINANCIAL INSTRUMENTS FAIR VALUES AND RISK MANAGEMENT (CONTINUED)

17.2 Financial risk management

The Group has exposure to the following risk arising from financial instruments:

- Credit risk
- Liquidity risk
- Market risk

i) Risk Management Framework

The Company's Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. The Board of Directors has established the risk management committee, which is responsible for developing and monitoring the Group's risk management policies. The committee reports regularly to the Board of Directors on its activities.

The Group's risk management policies are established to identify and analyse the risk faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's Audit Committee oversees how management monitors compliance with the Group's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risk faced by the Group. The Audit Committee is assisted in its role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

ii) Credit risk

Credit risk is the risk that one party will fail to discharge an obligation and will cause the other part to incur a financial loss. The Group has no significant concentration of credit risks. The Group's exposure to credit risk on its bank balances, trade receivables and due from related parties is as follows:

	30 September	31 March
	<u>2020</u>	<u>2020</u>
	(Unaudited)	(Audited)
Cash at bank	569,375,412	679,808,231
Advances, deposits and other receivables	356,096,857	346,380,988
Receivable from disposal of subsidiaries and brands	75,000,000	150,000,000
	1,000,472,269	1,176,189,219

The cash and receivable balances are monitored with the result that Group's exposure to impairment on doubtful debts is not significant. As at 30 September 2020, the Group has recorded a provision of SR 28.5 million (31 March 2020: SR 50.5 million) on other receivables.

iii) Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from the inability to sell a financial asset quickly at an amount close to its fair value. Liquidity risk is managed by monitoring on a regular basis that sufficient funds are available to meet the Group's future commitments.

iv) Market risk

Market risk is the risk that changes in the market prices – such as foreign exchange rates and commission rates— will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return.

18. CONTINGENTS AND COMMITMENTS

At 30 September 2020, the Group has outstanding bank letter of credits of SR 572 million (31 March 2020: SR 659 million) issued against certain purchase of retail trading inventory. At 30 September 2020, the Group has outstanding bank guarantees of SR 490 million (31 March 2020: SR 485 million) issued by the local and foreign banks in respect of bid bonds, contracts advance payments and performance bonds.

19. IMPACT OF COVID-19

During March 2020, the World Health Organization ("WHO") declared the Coronavirus ("COVID 19") outbreak as a pandemic in recognition of its rapid spread across the globe. This outbreak has also affected the group operations in all geographies. In response to the spread of COVID-19 and its resulting disruptions to the social and economic activities, management has also taken a series of preventive measures to ensure the health and safety of its employees as well as to ensure the continuity of its operations.

This includes but is not limited to cost-saving initiatives, such as rental concession on leased stores, negotiating delayed payment to brand partners, enrolling in government support initiatives for employees, reducing international travel expenditure and curtailment of capital expenditure.

While the Group has been able to continue to trade through eCommerce portals, sale from retail outlet stores and food franchise stores were closed for the period form 16 March 2020 until 20 June 2020 as instructed by the competent authorities in Kingdom of Saudi Arabia. Given the global political and economic uncertainty resulting from the COVID-19 pandemic, coupled with the fast-paced changes taking place across the retail sector, the Group expects to see significant volatility and business disruption in year 2020 - 21.

The management of the Group continues to monitor the situation and its impact on the Group's operations, cash flows and financial position. Management believes, based on their assessment, that the Group has sufficient liquidity available to continue to meet its financial commitments for the foreseeable future as and when they become due during the next 12 months period.
